Experience

- **Thesis Project**
 - Served as the **main developer**, leading both frontend and backend development.
 - Played a key role in designing, implementing, and optimizing project features.
 - Managed version control, file updates, and collaborative development using GitHub to ensure smooth project progress.
 - **Studypool**
 - Teaching and assisting students with their programming-related assignments, while also taking on commissioned projects from other students who need help developing their systems.
-

Project

- **Online Wedding Invitation with RSVP**
 - **Wedding Website:** Centralized platform for event details, communication, and RSVPs.
 - **Guest Info:** Includes bride and groom's story, venue details, and event schedule.
 - **RSVP System:** Enables attendance confirmation, stores responses, and sends confirmations.
 - **Repo:**<https://github.com/Shin-da/Wedding-invitation.git>
 - **Inventory Management System w/ Prescriptive and Descriptive analytics report**
 - Developed a shopping site with cart functionality, purchase history, and a login system requiring authentication for orders while allowing browsing without login.
 - **Repo:**<https://github.com/Shin-da/HFC-MANAGEMENT.git>
Note: The online shop branch is for the online store, while the main branch is for HFC management.
-

Skills

- **Languages :** Javascript, PHP
 - **Technologies:** MySQL, Git, GitHub, XAMPP, PhpmyAdmin
 - **Other:** Html, Css/bootstrap
-
